**Title**

Responsive Banking UI with Deposit/Withdrawal Buttons and Balance Display

**Objective**

Design a visually appealing and responsive banking user interface using only HTML and CSS, helping you practice modern layout techniques and styling without adding interactivity.

**Task Description**

Create a banking interface that includes:

- A balance display section (for example, a card or a highlighted box).
- A Deposit button.
- A Withdraw button.

The UI should:

- Be centered on the page.
- Use proper spacing and alignment to look clean and professional.
- Be responsive, adjusting gracefully on different screen sizes (desktop, tablet, mobile).

**Code**

```html
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1" />
